Why Beach Volleyball?

- 2v2 results in random, game-like volleyball experiences coupled with an outstanding number of contacts per person. The more players touch the volleyball, the better they become.
- It makes athletes better all around volleyball players. Each player must improve and master every skill of the game, as opposed to mastering one skill. In 2v2, both players on a team must pass, set, attack, serve, block, and dig.
- The NCAA approved beach volleyball as an emerging sport for women. That means there will be scholarships available for beach volleyball soon! Give your club exposure to this growing sport.
